MATERIAL SAFETY DATA SHEET

SPR International Inc.

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

02/03/2012

PRODUCT NAME:	.SPR [®] KF-48B™ Hardener.
PRODUCT CODE:	.KF-48B
CHEMICAL FAMILY:	.Amine.
CHEMICAL NAME:	. Modified aliphatic polyamine.
FORMULA:	.Not applicable.

MANUFACTURERED.FOR:

Transportation
3E:
770-966-1331 (International)
Poison Hotline:

2. COMPOSITION/INFORMATION ON HAZARDOUS INGREDIENTS

INGREDIENT NAME	<u>CAS #</u>	CONCENTRATION
Polyethylenepolyamine	29320-38-5	< 25%
Reaction products of TETA with Phenol/Formaldehyde	32610-77-8	< 25%
Triethylenetetramine (TETA)	112-24-3	< 15%
Hydroxybenzene	108-95-2	< 12%
Reaction Products of TETA and propylene oxide	26950-63-0	< 12%
Tetraethylenepentamine (TEPA)	112-57-2	< 12%

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Flammability - 1

HMIS Hazard Rating: Health - 3

Physical Hazards - 0

EMERGENCY TELEPHONE NUMBERS:

DANGER! Corrosive. Skin sensitizer. Moderate to severe skin, eye and respiratory tract irritant. May cause allergic reactions. Amber colored liquid with ammonia odor.

PRIMARY ROUTE(S) OF ENTRY: Skin contact, eye contact, inhalation.

POTENTIAL HEALTH EFFECTS:

SYMPTOMS OF OVEREXPOSURE: Respiratory tract irritation. Skin irritation and redness. Possible allergic reaction seen as hives and rash. Eye irritation. Possible liver and kidney disorders upon long term skin absorption overexposures.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE:

Chronic respiratory disease, asthma. Eye disease. Skin disorders and allergies.

FIRST AID MEASURES: 4.

medical attention.

water. Do not apply greases or ointments. Get medical attention if severe exposure.

FIRST AID FOR INGESTION: Give conscious person at least 2 glasses of water. Do not induce vomiting. If vomiting should occur spontaneously, keep airway clear. Get medical attention.

FIRE FIGHTING MEASURES: 5.

combustion products of varying composition which may be toxic and/or irritating. Combustion products may include, but are not limited to: oxides of nitrogen, carbon monoxide, carbon dioxide. When mixed with sawdust, wood chips, or other cellulosic material, spontaneous combustion can occur under certain conditions. If hardener is spilled into or mixed with sawdust, heat is generated as the air oxidizes the amine. If the heat is not dissipated quickly enough, it can ignite the sawdust.

SPECIAL FIRE FIGHTING PROCEDURES: Use full-body protective gear and a self-contained breathing apparatus. If spill has ignited, use water spray to disperse vapors and protect personnel attempting to stop leak. Use water to cool fire-exposed containers.

ACCIDENTAL RELEASE MEASURES: 6

SPILL OR LEAK PROCEDURES: Stop leak without additional risk. Wear proper personal protective equipment. Dike and contain spill. Ventilate area. Large spill - dike and pump into appropriate container for recovery. Small spill - dilute with water and recover or use inert, non-combustible absorbent material (e.g., sand) and shovel into suitable container. Do not use sawdust, wood chips or other cellulosic materials to absorb the spill, as the possibility for spontaneous combustion exists. Wash spill residue with warm, soapy water if necessary.

HANDLING AND STORAGE: 7.

Keep container tightly closed.

resin this product causes an exothermic reaction, which in large masses, can produce enough heat to damage or ignite surrounding materials and emit fumes and vapors that vary widely in composition and toxicity.

EXPOSURE CONTROLS/PERSONAL PROTECTION: 8

EYE PROTECTION GUIDELINES: Chemical splash-proof goggles or face shield.

neoprene, butyl rubber or natural rubber) and full body-covering clothing.

RESPIRATORY/VENTILATION GUIDELINES:

Use with adequate general and local exhaust ventilation to meet exposure limits. In poorly ventilated areas, use a NIOSH/MSHA approved respirator with an organic vapor cartridge.

Note: West System, Inc. has conducted an air sampling study using this product or similarly formulated products. The results indicate that the components sampled for (phenol, formaldehyde and amines) were either so low that they were not detected at all or they were well below OSHA's permissible exposure levels.

ADDITIONAL PROTECTIVE MEASURES:

Use where there is immediate access to safety shower and emergency eye wash. Wash thoroughly after use. Contact lens should not be worn when working with this material. Generally speaking, working cleanly and following basic precautionary measures will greatly minimize the potential for harmful exposure to this product under normal use conditions.

9. PHYSICAL AND CHEMICAL PROPERTIES:

PHYSICAL FORM	Liquid
COLOR	
ODOR	
BOILING POINT	
MELTING POINT/FREEZE POINT	
рН	
SOLUBILITY IN WATER	
SPECIFIC GRAVITY	11
BULK DENSITY	8.85 pounds/gallon.
VAPOR PRESSURE	< 1 mmHg @ 20°C.
VAPOR DENSITY	
VISCOSITY	1,000 cPs
% VOLATILE BY WEIGHT	ASTM 2369-07 was used to determine the Volatile Matter Content of
mixed epoxy resin and hardener. 105 Resin and 205 Hardener,	mixed together at 5:1 by weight, has a density of 1181 g/L (9.86 lbs/gal).
The combined VOC content for 105/205 is 9.75 g/L (0.08 lbs/ga).

10. <u>REACTIVITY:</u>

STABILITY: Stable.

HAZARDOUS POLYMERIZATION: Will not occur.

INCOMPATIBILITIES: Avoid excessive heat. Avoid acids, oxidizing materials, halogenated organic compounds (*e.g.*, methylene chloride). External heating or self-heating could result in rapid temperature increase and serious hazard. If such a reaction were to take place in a waste drum, the drum could expand and rupture violently.

11. TOXICOLOGICAL INFORMATION:

No specific oral, inhalation or dermal toxicology data is known for this product.

Oral:	Expected to be moderately toxic.
Inhalation:	Expected to be moderately toxic.
Dermal:	Expected to be moderately toxic.

Adsorption of phenolic solutions through the skin may be very rapid and can cause death. Lesser exposures can cause damage to the kidney, liver, pancreas and spleen; and cause edema of the lungs. Chronic exposures can cause death from liver and kidney damage.

CARCINOGENICITY:

NTP	٧o.
IARC	٧o.
OSHA	٧o.

This product contains no known carcinogens in concentrations of 0.1% or greater.

12. ECOLOGICAL INFORMATION:

Wastes from this product may present long term environmental hazards. Do not allow into sewers, on the ground or in any body of water.

Hydroxybenzene (phenol) (CAS # 108-95-2) biodegradability = 99.5% at 7 days.

13. DISPOSAL CONSIDERATIONS:

Incinerate, recycle (fuel blending) or reclaim may be preferred methods when conducted in accordance with federal, state and local regulations.

14. TRANSPORTATION INFORMATION:

TECHNICAL SHIPPING NAME:	(Triethylenetetramine)
D.O.T. HAZARD CLASS:	Class 8
U.N./N.A. NUMBER:	UN 2735
PACKING GROUP:	PG III

15. <u>REGULATORY INFORMATION:</u>

SARA TITLE III:

STATE REGULATORY INFORMATION:

The following chemicals are specifically listed or otherwise regulated by individual states. For details on your regulatory requirements you should contact the appropriate agency in your state.

CONCENTRATION	STATE CODE	
<12%	FL, MA, NJ, PA	
<15%	FL, MA, NJ, PA	
	<12%	<12% FL, MA, NJ, PA

16. OTHER INFORMATION:

PREPARED BY:	. C. L. Stevens
TITLE:	Health, Safety & Environmental
DATE:	
MSDS NUMBER:	. KF-48B

Note: The Hazardous Material Indexing System (HMIS), cited in the Emergency Overview of Section 3, uses the following index to assess hazard rating: 0 = Minimal; 1 = Slight; 2 = Moderate; 3 = Serious; and 4 = Severe.
