**Chipped, dull worn bathtubs are everywhere.  
Turn them to Cash!**

As a plumber you understand that most property owners do not want the expense of a new bathtub they just want it to "look like new". And now you can have a professional do it yourself method of tub repair and total restoration that was never possible before. With the SPR tub restoration kit and a few hours of your time you can restore a like new look to most, dull ugly bathtubs. The suggested retail price for bathtub refinishing is \$499.00 to restore an old tub to look like new. The SPR system is easy to learn and produces great and lasting results. We would like to share our eco-friendly products and our vast knowledge base with you and welcome you to become a part of our world-wide eco-friendly surface restoration team.

**Advanced NO-Spray Bathtub Restoration is now available to any entrepreneur who has the insight to recognize the benefits of this lucrative opportunity.**

### **RESTORE BATHTUBS EASIER THAN YOU EVER IMAGINED**

**No Paint, No Spray, Little or No Odors & Ready To Use The Same Day!**

#### **Each kit restores 15 or more bathtubs**

**Step 1** Clean the tub with the included scrub pad and a unique blend of pleasant smelling mild acids that will remove virtually everything on the tub, yet will not harm the surface.

**Step 2** Repair any chip or scratch with our chip Repair Kit.

**Step 3** We recommend applying Slip-Grip™ to the tub bottom to create a factory like surface for safety and cover any repairs made on the bottom of the tub.

**Step 4** Restore the tubs worn surface by using our unique method of applying SPR liquid polymer surface sealers to microscopically restore the dull, worn surface to its original look. Kits can not change the color of the tub but restores the original gloss and ease of cleaning.

**This process will never peel like a painted tub!**

**Step 5** Re-caulk the tub with our recommended caulking for a "like new look".

#### **KITS Restore 15 or More Tubs of any color**

Easy to follow instructions included

# Fiberglass Tub or Shower Bottom Rebuilding

**Cracked, Crushed, Soft etc.**

**Absolutely NO Spraying & No Foam Injection Necessary!**

Cracked tub bottom in two locations

Cracks or holes in the bottom of a fiberglass tubs or shower unit make them un-usable due to leaking and seepage.

Close up of a cracked area

Rebuilt and Slip-Grip coated

**Bottom Rebuild Kit**

Looks and feels like a factory bottom

Easy to follow instructions included

**SPR rebuilt tub and shower bottoms are rock hard and will highly resist re-cracking!!!**

This can be done in conjunction with or without restoring the entire tub using the SPR Tub Restoration Products  
**Easy to do once you understand how it works:**

- Without complicated and often damaging foam injection due to over expansion.
- No getting to the back or under the tub to insert supports.
- NO drain removal necessary.
- Used on thousands of damaged fiberglass bottoms and never a redo!

**Includes all necessary products:**

- NO Mess
- Low Odors
- Low Flammability
- Virtually NO clean up since all products are used in the process.
- Place used roller and mixing cups in a small plastic bag for disposal or recycling.
- Can be used on any brand and any conventional size tub or shower bottom. (Custom sizes available)

**IMPORTANT:** After bottom is completely rebuilt it should be coated with **Slip-Grip™** slip resistant coating for best appearance. All of this can easily be completed in a few hours. **The unit can be used the same day.**

**FTub Standard tub 16" X 34" .....**

**FShower Standard shower 36" X 36"..**

**FCustom Specify size or we send template for odd shape tub or shower...\$199.00 up**
